No. of Activity hours: 2 weeks (40hours)

Report:

During my Community Service Program with Samarthan Charitable and Educational Welfare Foundation Trust (06/03/2024 to 20/03/2024), I had the privilege of contributing to several impactful initiatives aimed at uplifting underprivileged communities. A significant part of my role involved educating government school children through engaging and interactive sessions on the importance of education, eco-friendly practices, and smart living. I conducted lessons on trending digital topics, such as the basics of technology, and simplified concepts in mathematics to help students build a strong foundation for their academic growth. I also emphasized the importance of adopting environmentally responsible habits through discussions and activities. As part of environmental initiatives, I actively participated in cleaning and maintaining the school premises, ensuring a healthier and more welcoming environment for the students. Additionally, I led a tree-planting drive, raising awareness among children about the importance of a clean and green environment while highlighting their role in sustaining ecological balance. Beyond these academic and environmental contributions, I also spent quality time playing and interacting with the children, building a sense of trust and connection that further motivated them to engage in the sessions. This six-week program not only allowed me to make a positive difference in the lives of these children but also deepened my understanding of the challenges faced by marginalized communities. It instilled in me a strong sense of responsibility, teamwork, and the belief in the transformative power of collective efforts. I am sincerely grateful to Samarthan NGO for providing me with this enriching opportunity and look forward to applying these lessons in future community service endeavors.
